

LBVBS Virtual Show and Tell

May 2020

Note: The copyright of all photos in this Virtual Show and Tell belongs to the photographers and not to the LBVBS (unless otherwise specified). Permission to use photographs for any purpose must be obtained from the photographer.

Welcome to the inaugural Virtual Show and Tell!

Let's start off with some photos from our President, Tom Rozelle. First up, an impressive Vriesea, a Hummel hybrid (Figure 1). Next, two Tillandsias: the inflorescence of Tillandsia tenuifolia in Figure 2) and a gorgeous Tillandsia argentina in Figure 3.

Finally, two specimens of Neoregelia 'Van Durme' in Figure 4. The plant on the right has an interesting pup that could be an albino(?); Tom has kindly provided some closer views of it (Figure 5).

In Figure 6 is a Fosterella petiolata that I keep indoors, in bright-ish light but not direct sun. This plant is in a 4-inch pot.

That's it for now. We will keep doing these virtual Show and Tells until we can meet again in person, so please send photos!
